**“TUFTURF” Polypropylene Entrance Matting**

**CLEANING AND MAINTENANCE**

Regular maintenance is vital to ensure that “Tufturf” remains effective.

**Daily Cleaning**

Normal daily soiling can be dealt with using a suction vacuum cleaner. A 2000 Watt model will give better results than a lower powered model. The use of rubber bladed wet floor tool attachment should increase the effectiveness of the cleaning.

**Periodic Maintenance**

Best results can be achieved by the periodic use of a spray or dry extraction carpet cleaning machine or, where possible, by the removal of the matting for pressure washing or steam cleaning.

The use of a mild detergent (neutral pH) cleaning solution in the carpet cleaning machine should loosen ingrained soiling and aid the removal of oils and grease. More stubborn stains should be treated a solvent based spot remover prior to re-cleaning with the detergent solution.

Chewing Gum can be removed by freeze spraying or with a proprietary chewing gum remover and then scraped or combed out of the matting carpet pile. This should be done before the full cleaning process is started.
